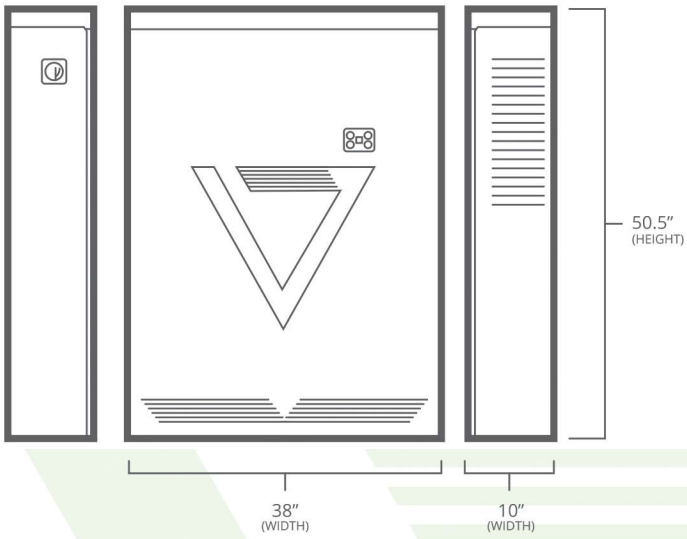
NV14 Specifications



The NeoVolta NV14 is a complete, fully integrated Alternating Current (AC) or Direct Current (DC) Hybrid (120V / 240V) Residential Energy Storage System (ESS). It includes a Lithium Iron Phosphate (LiFePO4) rechargeable battery system for photovoltaic energy conversion and storage, which allows consumers to use their own solar generation after the sun has set. The NV14 also allows consumers to power their homes in grid outages using either their solar or their stored energy in the battery system. The NV14 weighs 560 pounds and has to be ground mounted.
